The Arkansas Timber Price Report is a quarterly report of timber stumpage prices in Arkansas. Survey data for this report are provided by [Timber Mart-South](#). The price summary is provided to illustrate current, statewide market trends in timber product values for standing timber. These values may not reflect the stumpage values for a particular tract of timber. Timber prices may vary greatly depending on many factors including: location in the state, species, products, access, distance to mills, and site conditions. To obtain a report visit www.uaex.edu and go to the Environment and Nature tab, or www.afrc.uamont.edu. You can also contact your local county Extension agent. Trends: Overall, stumpage prices remained stable for all products in the second quarter of 2016. Pine pulpwood demand remains low, with stumpage prices ranging from 4 to 10 dollars per ton based on distance to a mill. Hardwood pulp experienced a price decrease for another successive quarter. The market for hardwood sawlogs remained strong and was again reflected in the stumpage prices. Housing starts continued to slowly increase which is good news for the pine sawtimber market.
