Income

Count only the amount you take home. That is what you can spend.

Some people are paid weekly, some every two weeks and some once a month.

If you or members of your household are paid weekly, put the amount in the “a week” column and multiply it by 4 to get the amount for “a month.” If you are paid every two weeks, put the amount in the “2 weeks” column, and multiply it by 2 to get the amount for “a month.” If you are paid once a month, put the amount in the “a month” column. Do this for all members of the household who contribute to the income.

Add the “month” totals for all members, and for “other” income, put this amount in the box for “total family income for the month.”

At the end of the year, add all the months for the yearly income.

	A Week	Two Weeks	A Month	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec
Wages Wage earner 1															
Wage earner 2															
Other Income Rents, Gifts Social Security															
Total for the month _____															

Our income for the year of _____ was \$ _____.
